github.com/yagneshhihoriya |

Skills

Languages: JavaScript, TypeScript, SQL

Technologies & Tools: Node Js, Express Js, Nest Js, Angular, AWS, EC2, DynamoDB, S3, SQS, Lambda, Elasticsearch, Docker, Kafka

Work Experience

Karmaleen Technology, Ahmedabad

Jan 2020 - May 2024

Senior Software Development Engineer

- As a software developer at Karmaleen I played an integral role in designing and developing innovative software solutions for clients across a range of industries.
- Adopted the latest RxJS Methodologies to build robust web apps.
- Writing Reusable, testable, and efficient code.
- Node Js, Javascript, TypeScript, Microservices, Lambda, S3, DynamoDB, EC2, SQS, SNS, AWS CDK, Elastic Search

Nimap Infotech, Mumbai

May 2019 - Dec 2020

Technology Associate

- Orchestrated microservices for server-side logic using Node.js cloud functions.
- Seamlessly integrated payment gateways and engineered services for order processing and subscription management using cloud functions.
- Node Js, express Js, Mysql, MongoDB, GCP, RazorPay, Stripe

Education

GTU, Ahmedabad

March 2017 - april 2020

B.E. in [Electronics and communication Engineer](#)

CGPA: 7.96/10

Relevant Coursework: Object Oriented Programming, Databases, Data Structures and Algorithms, Computer Networks, Machine Learning, Data Mining, Advance Data Structures and Algorithms, Information Retrieval, Image Processing

Project Work

- **Firstapp:** Developed Website for Easily send the FirstApp application to your customers via text message, email, QR code, or through our merchant portal in-store. Provide your customers with the convenience of completing the application process in a method that works best for them.
Technology: Node.js, Nest.js, Typescript, React Js, Microservices, AWS
- **Connected Life:** At ConnectedLife, we assist individuals in living their lives with ease, while staying connected to quality patient care and compliance through user-friendly interfaces. We design and develop databases using MySQL for efficient data management. Additionally, we configure and manage deployments on production to ensure seamless operations.
Technology: Node.js, Nest.js, Typescript, Angular, Microservices, azure
- **Apotech:** Apotec will be launching its Customer Relationship Management (CRM) software this year, realizing the next evolutionary step for Community Pharmacy, away from prescription centered legacy PMR platforms.
Technology: Node.js, Express.js, Typescript, Microservices, AWS, DynamoDb, Lamda, elastic Search
- **BubbleDoc:** BubbleDOC is the only online gateway dedicated to catering to the specific needs of hospitals with the most frequently used injectable formulations. The prime objective of this platform is to ensure that the hospital gets high-quality authentic injections at the best price with a very simple online ordering process. Participated in designing technical architecture of the system.
Technology: Node.js, Express.js, Docker, Kubernetes

- **Plassroom:** Understanding the requirements and designing a REST API for the project, as well as integrating the Stripe payment gateway. Designing and developing the database using MongoDB for the database project. Implementing Socket.io for live streaming and WebSocket functionality.
- Technology:** Node.js, Express.js, Typescript, Microservices, Azure, Stripe

Awards and Certificates

- ❖ **RedisTraining Certificate:** Empowering working professionals to elevate their problem-solving, coding, and system design abilities through Redis-related training.
- ❖ RESTful Microservices Using Node.js and Express Specialization on Coursera
